DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 07 October 2024 at 05:35 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Low levels of air pollution are expected across the UK. Scattered showers for many parts, and more persistent rain across northern Scotland, will help to limit the build-up of any pollutants.

Tomorrow: Little change is expected on Tuesday with widespread showers. Air pollution levels are forecast to remain Low across the UK.

Outlook: Changeable weather conditions are expected through the outlook period, with further showers or spells of more persistent rain. These will ensure air pollution levels remain Low.
